Description <u>New Service Options:</u> DIA fiber pricing as of 5/16/2022 based on 36- and 60-month terms respectively: 30mb-\$334/\$267 50mb-\$417/\$333 100mb-\$644/\$515 Comes with a /29 (5 usable static IP's - can keep existing), and we would move your phones to go over fiber as well-and this would replace your current coax connection. We have higher tiers up to 10G available if you would like pricing on higher tiers as well. Unlike the coax internet you are on, which is shared, this is dedicated just to your business-therefore speeds remain true, symmetrical, and have a 99.99% uptime. As for handoff we can do copper (RJ-45) or single or multi-mode fiber—your choice. Phone-you currently have 5 unlimited (unlimited LD in the continental US) and 1 fax or alarm line which is .10 a minute long distance on that if needed. 60-month term does get you the best locked in rate. And you can always upgrade if needed. We install a 2G switch, so an upgrade is very simple with no site visit needed. (928) 227-1750 Jerry Pane <u>Current Coax</u> (150mbps x 15mbps) - \$149.99 Double up speed now with the existing coax (300mbps x 30 mbps) - \$80 more per month
